MEMSPEED PRO II™

Clock Oscillator Programmer

The MEMSpeed Pro II programmer allows users to instantly program Abracon MEMS oscillators to a custom frequency in seconds through a Microsoft Windows GUI program on a PC. Abracon MEMSpeed Pro II supports CMOS, LVPECL, LVDS, and HCSL output MEMS oscillators in variety of package sizes. The oscillators can be programmed over their respective frequency range in increments of 100Hz (up to four decimal point resolution).

The MEMSpeed Pro II kit includes a programming dongle, USB cable, antistatic tweezers and USB flash drive with a Windows based PC installation program. The MEMSpeed Pro II is used with device dependent socket adapter cards and the appropriate package devices. (* Additional Socket Adapter is required for ASxM BLANK MEMS oscillators. Please contact Abracon for details.)

Abracon MEMSpeed Pro II offers quick turn drop-in solutions to traditional quartz crystal oscillators.
